MOMENTS THROUGH THE WINDOW

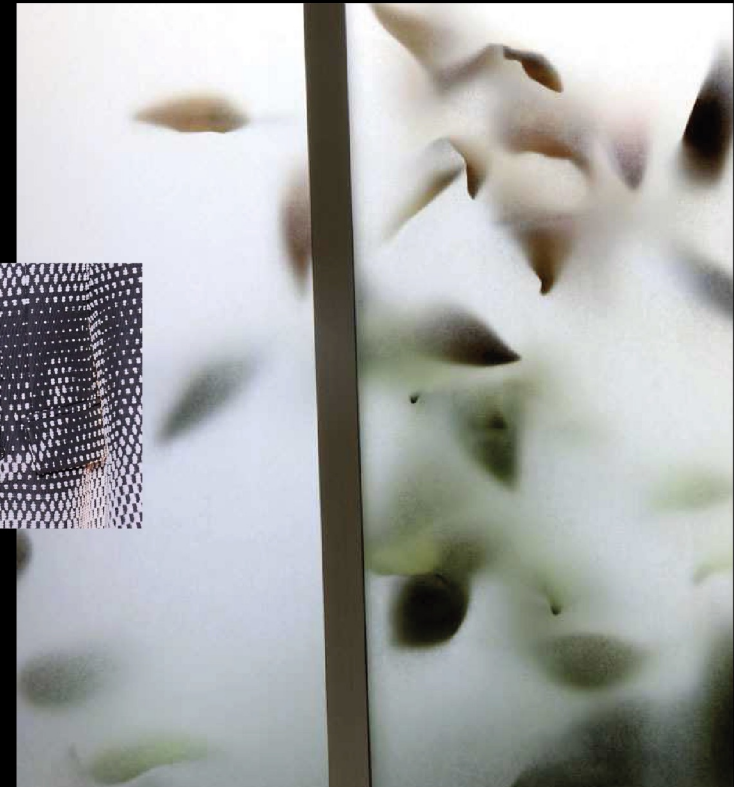

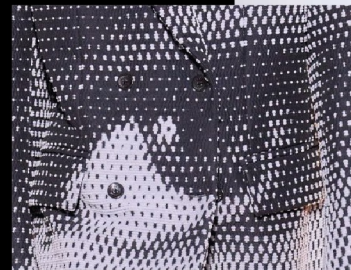

This project was inspired by the moments through the window. The moments seen through the window are fleeting. I want to capture that moment to 'save' it. Nature, Windows, and memories Preserved are the key concept for the designs.

PROJECT STORY

The moments seen through the window are fleeting. The sky and the trees are always there, but the seasons change, and with the passage of time comes change. I want to 'save' those moments as if I were taking them with a camera.

SAVEING

Preserved the Moment

The window - a frame of a famous artist's painting

Artist Research

Alejandro Almanza Pereda

In his work, the painting is hanging on the wall and a chunk of concrete is stuck on top of it. The result of spraying liquid concrete emphasize the construction absorbing the painting. From his work I get the idea of spray and concrete to for absorbing.

Alejandro Almanza Pereda

STRUCTURE

The structural elements of the window can be used for the upper design and overlay with various fabric and leather materials to express a view from the window.

Design Detail Research

Inspired by the **mountains** I saw through the window. I wanted the **sole** to have the texture of a stone mountain to give the impression of someone stepping on it.

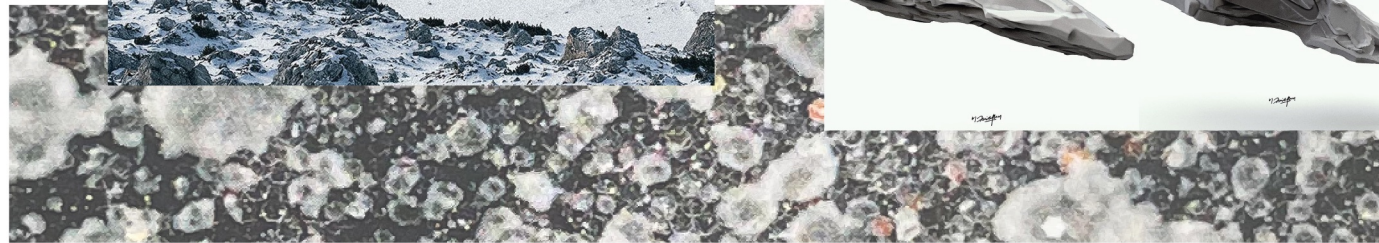

Sulpture Texture Sole Research

ROCK - Sculpture
SNOW - Salt

D3 sole development

3D

Salt helps preserve things. Like Sigalit's pickled shoes from Dead Sea, **salt** could use as **a shoe ornament**.

Salt years
Sigalit Landau

If I use salt as 'desintic', it can replace to jewellery such as Swarovski crystals to your clothes or shoes. However, jewellery can not capture the purity of the colour that come from nature, so I decided to use the salt itself.

MOOD BOARD

Theme in three things:
Windows, Frames,
and **memories preserved.**

Based on the Pantone 2023 colour of the year, the colour chips inspired from nature. The nature projected on the window gives soothing atmosphere, therefore the colours were chosen with greyish hues.
