

Héritage écochic

Sustainable Footwear: Innovation Meets Tradition

- Eco-Friendly Shoes Inspired by Timeless Craftsmanship

All-Season Comfort

- Our shoes can be worn in both summer and winter.
- For added warmth during the winter, simply insert a wool insole.
- Enjoy year-round comfort tailored to your needs.

Inspired by Brutalist Architecture

- Our design draws inspiration from the brutalist architecture of the former Eastern block
- This influence has a unique presence in Romania, blending historical and cultural aesthetics with modern fashion.

Rooted in Tradition

- The manufacturing technique is similar to that used for traditional Romanian **opinci**.
- Emphasizes durability and authenticity without the need for synthetic adhesives.

Eco-Friendly Construction

- No chemical adhesives, only natural materials that are easy to recycle.
- This approach supports a cleaner environment by reducing chemical waste.

Simplified Recycling Process

- Our shoes are designed to be easily recycled, reducing the burden on the environment.
- The absence of chemical dyes and glues ensures that the materials can be separated and recycled efficiently.

Collect → Dismantle → Clean → Recycle

Smart Design for Reduced Waste

- The design features multiple right angles, which helps minimize waste during the cutting process.
- This innovative approach maximizes the use of materials and reduces scraps.

Eco-Conscious Packaging

- Our shoe boxes are made from cellulose and contain grass seeds.
- Once the shoes are removed, the box can be planted in your garden, contributing to the ecosystem.

Innovate, Inspire, Recycle

- Our shoes represent a fusion of innovation and tradition.
- Join us in making a positive impact on the environment while enjoying timeless, comfortable footwear.

Take the Step Towards Sustainability
