Real Leather Stay Different

Untactile

Greta Gentile

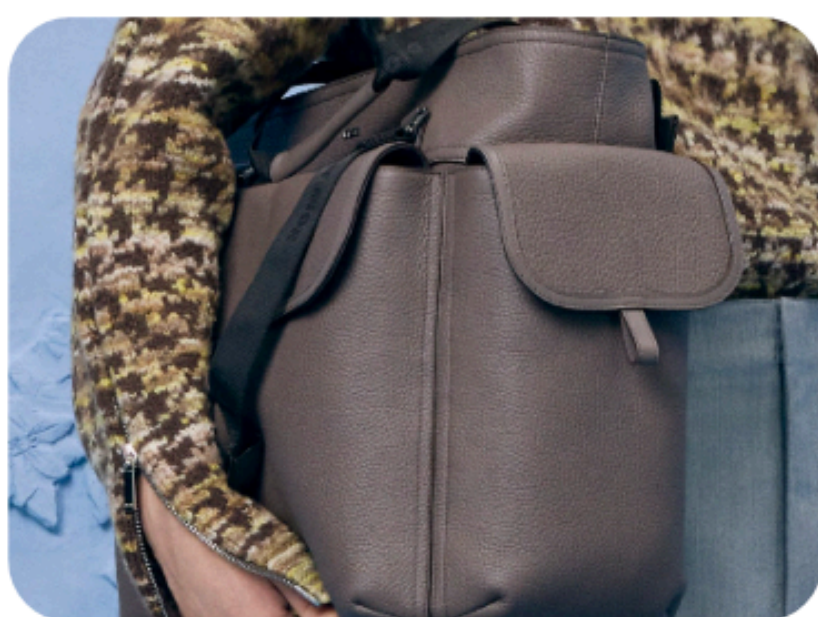

My accessory is part of the innovative “Untactile” collection, developed to meet the needs of Generation Z, who navigate a world increasingly intertwined between physical reality and the digital realm. This collection offers an unprecedented experience of comfort and softness. In a context where distinguishing the authentic from the digital becomes ever more challenging, “Untactile” provides a refined and tangible response, grounded in principles of softness, relaxation, and enveloping design. The accessory features premium materials, notably genuine leather and foam padding. The combination of the leather’s sophistication with the cushioning’s gentle embrace delivers exceptional comfort while imparting a sense of luxury and elegance. Each piece is thoughtfully designed to envelop the body, offering a calming respite from the fast pace of modern life. Characterized by generous, soothing, and embracing shapes, the design invites well-being. Its fluid lines and soft curves enable Generation Z to express their identity amidst a complex world, finding balance and tranquility through an essential, minimalist aesthetic. In an era marked by sensory overload and confusion, “Untactile” emphasizes essentiality and pure forms as a deliberate response to surrounding chaos. This approach allows for serene navigation through today’s complexities, harmonizing clean design with fundamental comfort.

Questo borsone, realizzato in pelle di vitello liscia, si distingue per il suo design innovativo e voluminoso, enfatizzato da un'imbottitura in ovatta sfusa che crea un effetto tridimensionale.

I doppi manici arricciati e imbottiti, aggiungono comfort alla presa e un tocco decorativo distintivo. I laterali del borsone sono dotati di dettagli funzionali e pratici, con coulisse che ne completano l'estetica dinamica.
