HIGH HEELS CRAFTED TO LAST — DESIGNED FOR YOU

NHUNG DANG, REAL LEATHER. STAY DIFFERENT. VIỆT NAM 2025

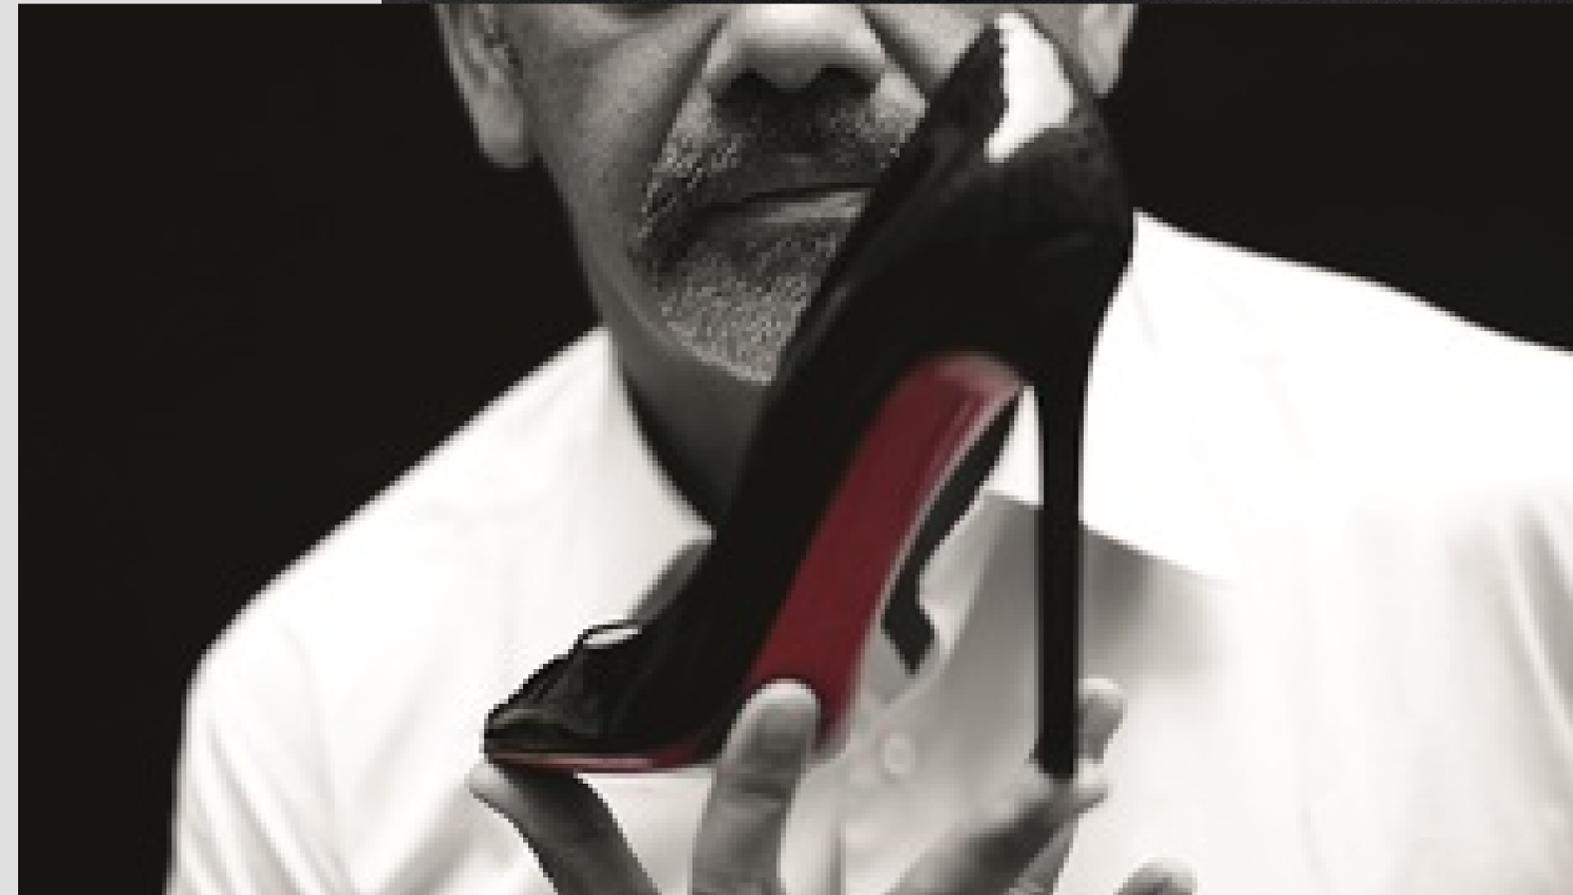

“TOUCHING TIMELESS VALUE”

We choose Real cattle leather not just for its rugged beauty and natural charm, but because:

- It ages beautifully with time.
- It's a byproduct of the meat industry, repurposed into lasting value.
- And above all, it stands the test of time – reducing waste and fighting against fast fashion.

WHY ARE HIGH HEELS MADE FROM REAL CATTLE LEATHER TIMELESS?

Real cattle leather is not just a material. It is a story of time, maturity and personality. A real cattle leather shoe can be with you for 5 years, 10 years, or even longer. The more you use it, the more it will change color and shine, following the traces of time and the story of the owner..

**“CHARMING IN EVERY STEP
STRONG IN EVERY DECISION”**

HIGH HEELS WITH REAL CATTLE LEATHER

1 “SUSTAINABLE FASHION”

The materials used in the collection are mainly real cattle leather, a sustainable alternative to synthetic fibers that pollute the environment. Wishing to promote change in the current model of fashion production and consumption.

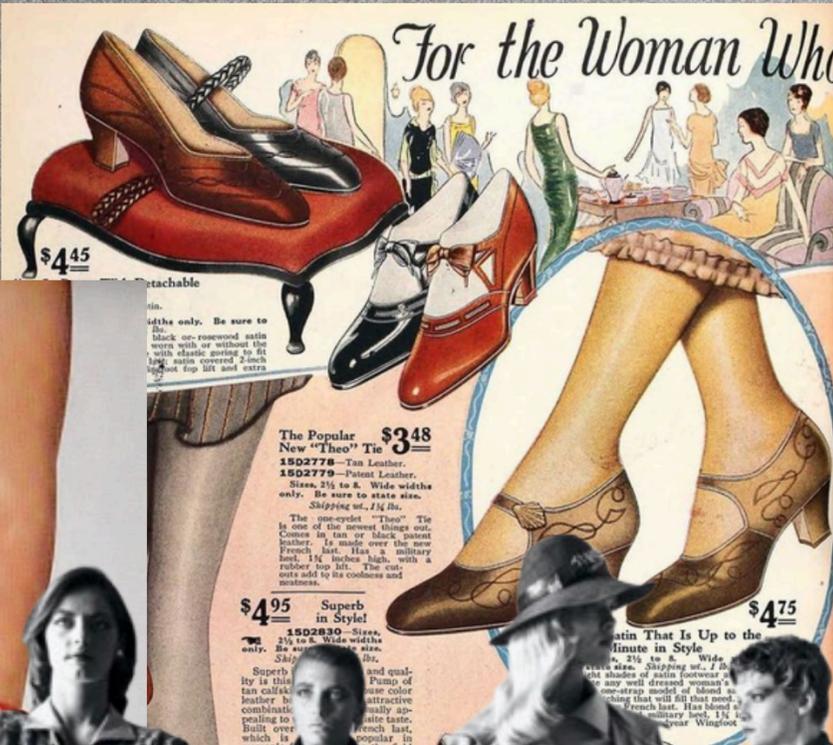

2 “NOT FAST FASHION”

When you choose a real cattle leather high heel shoe, you are not just buying a bag or a pair of shoes. You are choosing: an attitude of life that does not follow the crowd, does not consume in a “use and throw away” way.

3 “CELEBRATE INDIVIDUALITY AND CREATIVITY”

High heels have long been a symbol of personal style, confidence and a means for women to express their charm, power and desire for autonomy, asserting their right to self-determination over their own lives.

**REAL
LEATHER.
STAY
DIFFERENT.**

We believe that fashion can be kinder, smarter and more thoughtful. And that journey starts with small choices – like deciding to invest in a pair of genuine cowhide heels, instead of five pairs of cheap, quickly falling apart heels.

Your consumption habits will determine your environmental impact

THANK YOU
