

"Odyssey in time"

Virginia Savorani

"Odyssey in Time" is a capsule collection that explores the golden age of air travel through the lens of accessories design. Inspired by the golden age of aviation in the 1960s and 1970s, the collection blends vintage elegance with a contemporary vision.

Rooted in a personal heritage, it pays tribute to a woman who lived through that glamorous and elegant era, collecting unique accessories as lasting symbols of identity and memory.

The collection embraces artisanal craftsmanship through the use of capim dourado, a naturally golden Brazilian fiber. Handwoven, shaped into metallic variations, and translated into embossed leather textures, this material connects artisanal tradition and experimentation.

The entire collection also features contrasting metallic finishes in paired gold and silver tones, giving each piece a distinctive character.

Odyssey in Time reimagines travel as a timeless source of elegance, nostalgia, and experimentation.
