

# Care For What!

**Sai On Leng Hsai (Leng)**

## About me

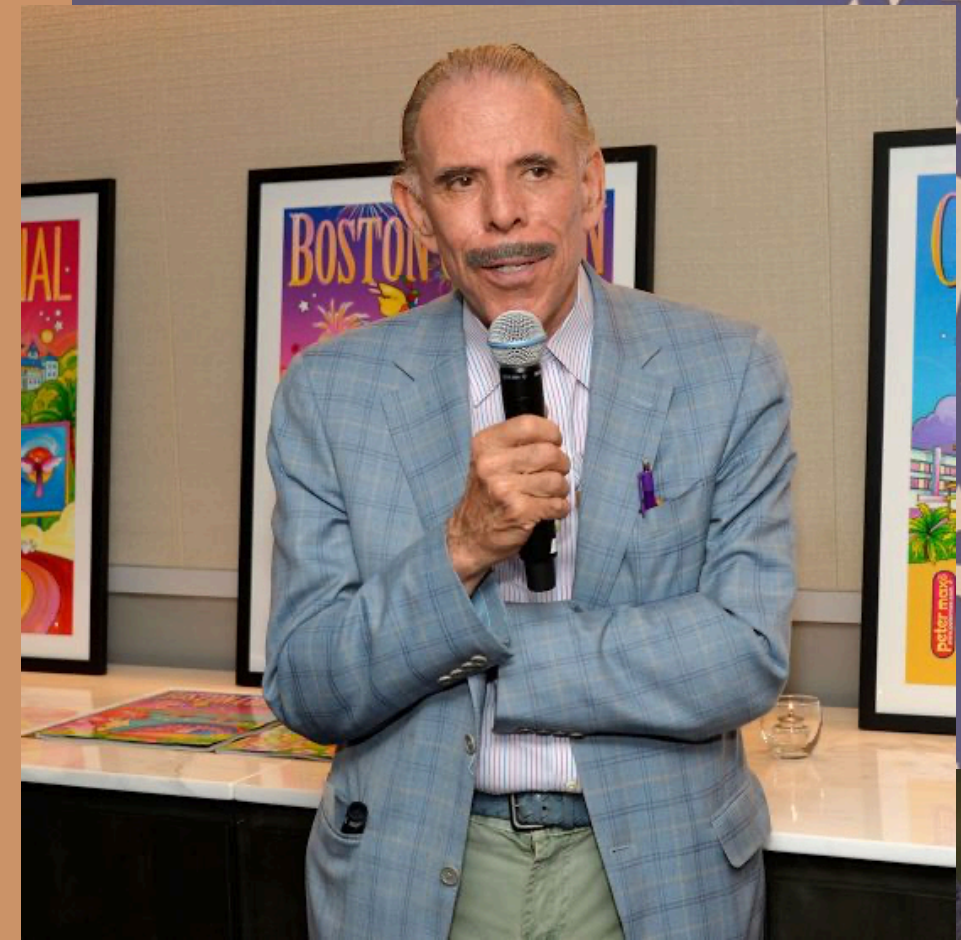

Hello, my name is Sai On Leng Hsai (Leng). I am currently at the age of 20 and originally, from Myanmar, Keng Tung who is a student from raffles international college BKK majoring in fashion design 2<sup>nd</sup> year. Creating the garments blending with arts are what I most fond of when it comes to designing fashion .I really enjoy when I have to sketch, make pattens and sew as these make me delight, clam and creative. With the knowledges I have learned through my fashion design journey, I would thus like to present with my creations on this RLSD competition.

# Idea and concept

When I first thinking about designs the garments based on the outline of being sustainable and eco friendly, I have got an idea of blending fashion with pop art and singer. It makes me even more excited in combining these two because of my very first time giving a try to it. For that reason, I choose Peter Max's vibrant artworks as a part of my designs to make the garments stand out with bold, expressive visuals. Addition, I chose a singer, Conan Gray as my muse because his emotional depth and unique style align with the aesthetic and feeling I want the garments to evoke. So, by combining fashion with art and music, I believe to create pieces that are not only eco-friendly but also powerful forms of self-expression.
