

A lush, dense tropical forest scene. The foreground is filled with various types of green plants, including ferns and palm-like leaves. The background shows taller trees with thick canopies, creating a sense of depth and a vibrant green environment. The lighting is bright, suggesting a sunny day.

Illusionist

Concept : Illusionist

Drawing on the chameleon's ability to "change color into camouflage" and its "multisensory vision," this bag creates a novel experience for users. The bag doesn't have a fixed appearance but changes depending on the viewing angle, light reflection, and movement, creating an "optical illusion" for those who see it.

Modular Attachment: Features a prehensile tail (like a chameleon's tail) strap or hook that can be rolled up and store

3-Horn Clasp: A three-pronged, tapered metal clasp that meets in the center of the bag's flap. d.
