Daffodils

Rebirth and new beginnings. A gift of daffodils is said to suggest good luck, however, if it is just a single bloom gifted this instead is supposed to foretell misfortune, so take care when giving daffodils as gifts.

REBLOOM

CONCEPT

REBLOOM

A shopping bag inspired by the Daffodil, the flower of March — a symbol of new beginnings and hope. It reflects a personality that is gentle yet resilient, always ready to rise and bloom again through every stage of life.

The design is minimal and effortless, featuring soft yellow tones that resemble the first light of spring — a bag made to carry a sense of warmth and renewal every day.

Material: Genuine cow leather with a smooth matte finish, combining elegance with durability while maintaining a soft and minimal aesthetic.

The soft yellow, cream, and light green palette complements the leather's texture beautifully, creating a clean and luxurious look with a quiet luxury aesthetic. Paired with a minimal design and subtle detailing, the bag appears refined and sophisticated, making it especially striking in presentation

Mina is a Japanese idol and a member of the K-pop group TWICE. She is known for her gentle, graceful, and elegant image, reflecting a simple yet soft femininity — much like the aesthetic of the bag, with its muted yellow tones and minimal design
